/lab_host="DH10B (Life Technologies)"
/note="Vector: pT7T3D-pac (Pharmacia) with a modified
polylinker; Site_1: Not I; Site_2: Eco RI; This library
consists of a mixture of individually tagged normalized
libraries constructed from rat placenta, adult lung, brain
, liver, kidney, heart, spleen, ovary, and muscle. The tag
is a string of 3-5 nucleotides present between the Not I
site and the oligo-dT track which allows identification of
the library of origin of a clone within the mixture."

/ Abc_bost="P1713D-Pac (Pharmacia) with a modified polylinker; Site_1: Not I; Site_2: Eco RI; The NIH_BMAP_MS3.2 library is a subtracted library of a series, ultimately derived from a mixture of individually tagged normalized libraries from ten regions of the mouse brain (cerebellum, brain stems, olfactory bulbs, hypothalamus, cortex, amygdala, basal ganglia, pineal gland, striatum, hipoccampus) after a series of subtractions to reduce the representation of cDNAs from which ESTS had already been generated. The following serially subtracted libraries were generated in this process: NIH_BMAP_MS3.2, NIH_BMAP_MS3.2, was constructed as follows: PCRamplified cDNA inserts from NIH_BMAP_MS2 clones from which 3' ESTs had been derived was used as a driver in a hybridization with the NIH_BMAP_MS2 library in the form of single-stranded circles and electroporated into DH10B single-stranded circles and electroporated into DH10B bacteria (lifferchnologies) to generate the NIH_BMAP_MS3.2 library. This procedure has been previously described (Bonaldo, Lennon and Soares, Genome Research 6:791-806, 1996)
              Email: mEST@mail.nih.gov
The sequence contained an oligo-dT track that was present in the oligonucleotide that was used to prime the synthesis of first strand cDNA and therefore this may represent a bonafide poly A tail. The sequence tag present in the cDNA between the NotI site and the oligo-dT track served to identify it as a clone from the normalized pineal glands library CDNA Library Preparation: M.B. soares Lab Clone distribution: NIH BMAP cDNA clones will be made available by the means that is soon to be determined. When NIH determines the means for distribution of the BMAP cDNA clones, this record will be updated accordingly when that means is determined.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           EST 11-SEP-2000
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 uw66602.yl Soares_mammary_gland_NMLMG Mus musculus cDNA clone

The sequence contained an oligo-dT track that was present in the oligonucleotide that was used to prime the synthesis of first strand cDNA and therefore this may represent a bonafide poly A tail. The sequence tag present in the cDNA between the Not1 site and the oligo-dT track served to verify it as a clone from the non-normalized ovary at estrus day 12 library CDNA Library Preparation: RJ Woods, JA Green, RS Prather S142 Animal Science Research Center, Department of Animal Science, University of Missouri-columbia, 65211 Clone distribution: oliones will be available through Research Genetics (www.resgen.com) The following repetitive elements were found in this cDNA sequence: 1-28, Seq primer: M13 Forward

Division of Experimental Animal Research in Riken contributed to prepare mouse tissues. 1st strand cDNA was primed with a primer [5' decorated with a primer [5' decorated with a primer [5' decorated with a primer sprepared by using trehalose thermo-activated reverse transcriptase and subsequently enriched for full-length by cap-trapper. Second strand cDNA was prepared with the primer adapter of sequence [5' decorated with the primer adapter of sequence [5' degreence

//note="Vector: pBlueScript II (SK-); Site_l: EcoRV; C.
parvum (IONA isolate) genomic DNA was hydrodynamically sheared to produce fragments having a tight size distribution between 2-4 kb by Dr. Yvonne Thorstenson of the Stanford DNA Sequencing and Technology Center (http://sequence-www.stanford.edu/group/techdev/shear.htm)
// The randomly sheared gDNA was chromatographed on Sephacryl S-400 to remove any small fragments and DNA eluting in the void volume was subcloned into an EcoR V-digested, alkaline phosphatase-treated pBlueScript II (SK-) vector and transformed into E. coli strain XL2 Blue MRF'. Recombinant clones from the first plating of the library were selected for sequence analysis using T3 and T7 primers."

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Froger and and agequenced in Mouse Genome Encyclopedia Project of Genome Exploration Research Group in Riken Genomic Sciences Center and Genome Science Laboratory in RIKEN. Division of Experimental Animal Research in Riken contributed to prepare mouse tissues. 1st strand cDNA was primed with a primer [5" decorated to prepare mouse thermo-activated reverse prepared by using trehalose thermo-activated reverse prepared by using trehalose thermo-activated reverse transcriptase and subsequently enriched for full-length by cap-trapper. CDNA went through one round of normalization to Rot = 10.0 and subtraction to Rot = 100.0. Second
                                                                                                                                                                                                                                                                                                                                                                                                                                                 Eukaryota; Metazoa; Chordata; Craniata; Vertebrata; Euteleostomi;

Division of Experimental Animal Research in Riken contributed to prepare mouse tissues. 1st strand cDNA was primed with a primer [5] to be a primer primer primer primer by captrapper. cDNA went through one round of normalization to Rot = 10.0 and subtraction to Rot = 185.0. Second strand cDNA was prepared with the primer adapter of sequence [5] dadagangerrorcdactrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantarrantar
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             /organism="Mus musculus"
